SUMMARY

Analytics engineer with 4+ years of experience translating raw data into business impact across AML compliance, product analytics, and financial forecasting. Built cloud-native pipelines on AWS and Snowflake, integrated OpenAI APIs into compliance workflows, and deployed ML-based anomaly detection in production. Known for bridging engineering and stakeholder communication, from DBT models and ETL pipelines to executive Tableau dashboards driving \$1M+ in decisions.

SKILLS

Analytics & Data Analysis: Python, SQL, EDA, A/B Testing, Forecasting, Time Series Analysis, KPI Tracking

Data Warehousing & Analytics Platform: PostgreSQL, OFSAA, Snowflake, Databricks, AWS (S3, EC2, IAM, Lambda)

Business Intelligence & Data Visualization: Tableau, Excel (Pivot Tables, Macros), Google Data Studio, Power BI

Delivery Methodologies & Collaboration: Agile, Scrum, SDLC, Data Governance, Stakeholder Collaboration

PROFESSIONAL EXPERIENCE

Protiviti

United States (Remote)

Data Analytics Engineer

Oct 2025 – Present

- Architected a cloud-native AML pipeline on **AWS and Snowflake**, cutting compliance reporting latency by 60%.
- Built and tested **DBT models on Snowflake** for AML features, enabling self-service analytics for 3 compliance teams.
- Fine-tuned **AI-assisted** anomaly detection and text analytics models, embedding outputs into compliance reporting workflows.
- Implemented **Generative AI tools (ChatGPT, Copilot)** for **SQL generation**, data exploration, and documentation automation.
- Integrated **LLM text analytics (OpenAI API)** into STR workflows, reducing average documentation time by 35%.
- Migrated **Excel-based** reporting to automated pipelines, **reducing manual effort by 40%** and improving accuracy.
- Published **interactive 4+ Tableau compliance dashboards** with row-level security for **regulators and leadership**.

E-SOLUTIONS

San Francisco, CA

Data Analyst II

Jul 2024 – Sep 2025

- Built automated **ETL pipelines** using **Python** and **SQL** across **Snowflake** and **Databricks**, enabling real-time reporting.
- Partnered with **2-3 product stakeholders** to define analytics requirements and prioritize data-driven feature enhancements.
- Presented analytics-driven business cases to **VP-level stakeholders**, resulting in an approved \$1.2M growth budget reallocation.
- Standardized **core KPI definitions** and reporting logic, improving data consistency across multiple analytics consumers.
- Analyzed A/B test results using Python to guide product decisions, **improving experiment conversion rate by 18%**.

Data Analyst I

Jun 2023 – Jun 2024

- Created forecasting models for sales planning, improving 15% in forecasting accuracy and \$175K reduction in excess inventory.
- Delivered **SQL-based ad-hoc analyses**, reducing recurring reporting turnaround time by **20% through query standardization**.
- Delivered executive-ready **Tableau dashboards** for marketing, product, and finance teams, shortening decision cycles by 32%.

SPECTRUM WEBAPPS

Gurgaon, India

Data Analyst

Jan 2021 - Aug 2021

- Led analytics initiatives aligning **5+ stakeholders**, defining metrics, and delivering insights, driving informed business decisions.
- Reduced churn by 27%** by identifying product drop-off points using funnel analysis and behavioral clustering.
- Analyzed user engagement data from active product users to identify retention drivers and optimization opportunities.
- Collaborated with product managers to **define success metrics** and monitor feature performance post-launch.
- Developed client-facing knowledge base documentation, increasing self-service adoption by 30% and reducing support requests.

ZS ASSOCIATES

New Delhi, India

Data Analyst

Oct 2019 - Dec 2020

- Upgraded the **Excel Macros** tool using **ERP** and **VBA** for 106 countries, handling data ingestion and data change requests.
- Build a time-series forecasting and business intelligence model, improving sales accuracy to 93% across 15+ client markets.
- Conducted client-level performance analysis supporting forecasting and planning discussions with senior consulting stakeholders.
- Validated and reconciled multi-source datasets to ensure accuracy in recurring **client-facing analytics deliverables**.
- Developed **SQL ETL pipelines** integrating **PostgreSQL**, flat files, and APIs, enabling daily refreshes for 15+ reports.

PROJECTS

Movie Script Analysis

Sep 2022 – Dec 2022

- Performed a data analysis and statistical analysis of the Twilight movie and web scraping of the reviews for the movie and the characters from movie review websites like IMDB, Rotten Tomatoes.

Cell Tracking Challenge

Sep 2021 – Dec 2021

- Presented a final paper showcasing an accuracy of 98.27% for the training and 97.625% for the challenge set.

EDUCATION

Drexel University

Philadelphia, PA

Master of Science in Machine Learning Engineering

Sep 2021 – Mar 2023

Dr. A.P.J. Abdul Kalam Technical University

Lucknow, India

Bachelor of Technology in Computer Science and Engineering

Jul 2015 – Jun 2019
